We will need to start the process NLT July 2017 if this is the action we want to take. If OARM decides to continue under out contract then we won't have to make any changes since they already delineate O&M reimbursable by facility. But Mark will still work under Marty. To make it otherwise will also require a contract mod (which would also need to be submitted by July 2017).

Hi Stephanie,

The contract will need to be modified as a change order and this can take some time. The SOW will need to be revised to remove the services at Grosse Ile via a mod and the contractor will have 30 days to submit a price adjustment proposal. Is the contractor still performing work at Grosse Ile under the current SOW? If they are, when do you want the services to end at that location? The contractor will need to this information in order to prepare their price adjustment proposal.

Marsha

**Subject:** Steps for removing Grosse Ile from the Dawson O&M Contract (EP-D-15-042)

Hi Marsha,

ORD is in the process of extricating itself from the Grosse Ile, Michigan facility. Is it possible for us to remove Grosse Ile janitorial and O&M operational requirements from our existing Dawson Contract (EP-D-15-042) via a simple contract modification? Or will this contract need to be re-competed? Can you please provide the steps we need to take to remove Grosse Ile from our existing contract?

We will be receiving Grosse Ile operational funding support for FY17 but (most likely) losing those funds for FY18.

Please advise,

Stephanie Warhol
